CONFERENCE CHAIR MESSAGE

Dr. Vincent W Ho

“International Conference of Akademiika Nusa Internasional ” is a platform that thrives to support the worldwide scholarly community to analyze the role played by the multidisciplinary innovations for the betterment of human societies. It also encourages academicians, practitioners, scientists, and scholars from various disciplines to come together and share their ideas about how they can make all the disciplines interact in an innovative way and to sort out the way to minimize the effect of challenges faced by the society. All the research work presented in this conference is truly exceptional, promising, and effective. These researches are designed to target the challenges that are faced by various sub-domains of the social sciences, business and economics, applied sciences, engineering and technology, health and medical sciences.

I would like to thank our honorable scientific and review committee for giving their precious time to the review process covering the papers presented in this conference. I am also highly obliged to the participants for being a part of our efforts to promote knowledge sharing and learning. We as scholars make an integral part of the leading educated class of the society that is responsible for benefitting the society with their knowledge. Let’s get over all sorts of discrimination and take a look at the wider picture. Let’s work together for the welfare of humanity for making the world a harmonious place to live and making it flourish in every aspect. Stay blessed.

Thank you.

Dr. Vincent W Ho

CONFERENCE SECHDULE

ANISSH-2018

Venue: Titania Hotel Panepistimiou 52, Athens 10678 Greece

Time: Registration & Kit Distribution (09:00 - 09:30 am)

Day: Saturday

Date: June 23, 2018

Venue: Room 1

09:30 am - 09:40 am	Introduction of Participants
09:40 am - 09:50 am	Inauguration and Opening address
09:50 am - 10:00 am	Grand Networking Session

Tea/Coffee Break (10:00 - 10:30 am)

DAY 01 Saturday (June 23, 2018)

First Presentation Session (10:30 am - 12:00 pm)

Venue: Room 1

Session Chair: Dr Vincent W Ho

Presenter Name	Manuscript Title	Paper ID
-----------------------	-------------------------	-----------------

Track A: Business, Management, Social Sciences & Humanities Studies

Nino Pailodze	The Peculiarities of Accounting and the Ways of their Solutions	IABMSR-068-ANI101
Evgeni Baratashvili	For Creative Management Decisions	IABMSR-068-ANI102
Alice-Rebeca Jordan	Everyday Decision Making Styles and Outcomes- Introversion and Extroversion	KKMS-JUN-106
Bob Barrett	Using Technology for Creating Better Virtual Learning Experiences and Applications for Adult Learners	IABMSR-068-ANI103

Track B: Engineering, Technology Computer and Applied Sciences

Kasim A. Korkmaz	Disaster Assessment with Pre- and Post-Event Satellite Image	EIBA-JUNE-A1003

Keywords:Intangible Assets, Fixed Assets, Tax System, The Taxpayer, Taxes.

The phase transformation processes occurring in Georgia's current tax policy, taxes, and tax system of financial accounting and its role in the formation of public financial resources. Taxation is not the only source of budget formation, but they have an important role in the formation of state revenues. The state taxes are inextricably linked. The sectoral structure of tax revenues due to the significant improvement in the determination of tax rates applicable tax laws, rules and methods for collecting and effective tax system in the country. Organically linked to the budgetary revenue of the optimal tax framework, and the optimal tax - budgetary policy. Therefore, it is important to Georgia in the formation of the optimal tax revenues, which guarantees the stability of public finances.

For Creative Management Decisions

^{1*}Evgeni Baratashvili,²Irma makharashvili

^{1,2}Department of Business Administration, Technical University of Georgian, Tbilisi-Georgia

Corresponding Email: ninopailodze@mail.ru

Keywords: Non-Standard, Management Decisions, Creative Work, Decision Maker.

Overall, management decisions are the development and implementation of management impacts on the objects of management. In accordance with the existing typologies of management decisions three main types of solutions are allocated: Routine management decisions. These are the decisions whose mechanisms are already well known or are still typical and have no creative character; Combined management decisions. The initiative and the freedom of action are revealed only within limited limits in the process of implementation and their implementation. In the course of their development, converting well-known decision making mechanisms and new non-standard and original creative approaches are: Nonstandard management decisions - creative, original, non-traditional, non-copied decisions that are developed and realized are difficult, unforeseen, critical and nonstandard In situations. In order to solve the problem it is necessary to adopt a principled new, extraordinary decision, often uncompensated and innovative decision.

Everyday Decision Making Styles and Outcomes- Introversion and Extroversion

* Alice-Rebeca Jordan

Social and Behavioural Sciences Faculty of Health and Life Sciences/ Coventry University, United Kingdom
Corresponding Email: iordana@uni.coventry.ac.uk

Keywords: Decision-Making, Personality, Introversion, Extroversion.

Day by day people face decisions in areas as diverse as choosing what to wear, what medical prescriptions and procedures to opt for, to friends, beliefs, and careers perspectives. Extracting relevant information and applying suitable decision-making skills are preventing them from negative decision outcomes. The procedures approached by decision-makers is considered to be consistent for each person but to vary from one individual to another (Scott and Bruce, 1995). In this view, previous research addressed whether personality explains variance over and above decision quality and decision making styles (Davis et al. 2017), however, there is little research addressing the influence of cortical arousal levels, (Introversion-Extroversion), in this context. Aiming to expand on a sparse literature area, this study explores the relationship between personality dimensions, introversion and extroversion, decision-making styles and decision quality outcomes in a sample of undergraduate psychology students. The current study utilized a multi-correlational design. Participants (N=143) completed an online survey of three validated measurements were used: Mini Markers (Saucier, 1996), General Decision Making Style (Scott and Bruce 1995) questionnaire, and Decision-Making Outcomes Inventory (Bruine de Bruin et al. 2007). Results showed that personality is not a predictor of decision outcomes but might explain at some degree variance towards decision-making styles. These findings suggest that levels of cortical arousal might influence the extent to how people approach decisions. Likewise, there was found that poor decision quality outcomes might be attributed to the process of which decision makers approach a situation. The study also adds to prior congruent research that people may use more than one decision-making style at once Girard et al. 2016. Taken together, the study may be applicable in terms of clinical interventions as well as various job-related aspects.

Using Technology for Creating Better Virtual Learning Experiences and Applications for Adult Learners

*Dr. Bob Barrett

School of Business American Publish University -Charles Town, USA

Corresponding Email: docjob00@msn.com

Keywords: Online Learning, Workplace Basics, Leadership

For many adult learners, the choice for education has been narrowed to the Face-to-Face Classroom environment, but with the ever-changing impact of new technology, virtual learning has offered an alternative which has attracted more adult learners to return back to education for personal and professional reasons. However, many of these adult learners need to see more value for their time and money than ever before, since they have had a variety of reasons which have previously prevented them from the classroom environment. Consequently, in light of the Babson (2015) study, one of three students are now taking online courses, which demonstrates that technology has now enabled more learners to return back to education, but educational institutions need to create better learning experiences and applications to not only attract but retain these learners. As a result, teaching practices and innovations are needed in order to improve and increase the quality of education and create more meaningful learning experiences. This presentation will examine at how one university has created better virtual learning experiences to help students transition from the traditional Face-to-Face (F2F) learning environment mindset to one of a virtual nature. Thus, this virtual learning environment has offered a variety of online classroom applications to help students apply knowledge and see the value as they work on a virtual consulting project. Strategically, this school has created a virtual learning experience where the student will develop an Electronic Consulting Practice (ECP). The learners were exposed to a variety of media on how to create their first web page to incorporate the portfolio segments to go live on the web for the fulfillment of the course requirement, and to use it later as a working portfolio to add to their course work in future classes to share with future employers as their digital form of art, but in rather in the form of organizational consulting and business conceptual learning activities. Consequently, the students learn how to apply their course content knowledge to a real world application for creating their own consulting practice and learn in real time the various processes needed for creating such a practice and implement with the use of software, research, and apply their learning to create value not only for course credit, but for later use of their own.

TRACK B

ENGINEERING, TECHNOLOGY COMPUTER AND APPLIED SCIENCES

Disaster Assessment with Pre- and Post-Event Satellite Image

¹Munther Abualkibash,^{2*}Kasim A. Korkmaz

¹ Eastern Michigan University, School of Information Security and Applied Computing, Ypsilanti, MI, ²Eastern Michigan University, School of Visual and Built Environments, Ypsilanti, MI

Corresponding Email: kkorkmaz@emich.edu

Keywords: Disaster Management, image processing, Harveys Wrath.

Image processing is one of the new tools, that can be used as an efficient disaster assessment process tool. Implementation of image processing in disaster assessment allows rapid and accurate response. Using before and after event images makes possible the disaster management effective. In this paper, image processing and computer vision technologies were applied for an example disaster. Hurricane Harvey was selected as a case study and before and after hurricane satellite images were used for the analyses. The visual assessment carried out by considering a hurricane comparing the pre and post event images. Damage assessment by using image differences gives a damage profile in the effected areas. Such assessment can be used for the immediate response right after the disaster by the rescue teams to locate the damaged areas.
