CONFERENCE CHAIR MESSAGE

Dr. Vincent W Ho

“International Conference of Akademia Nusa Internasional ” is a platform that thrives to support the worldwide scholarly community to analyze the role played by the multidisciplinary innovations for the betterment of human societies. It also encourages academicians, practitioners, scientists, and scholars from various disciplines to come together and share their ideas about how they can make all the disciplines interact in an innovative way and to sort out the way to minimize the effect of challenges faced by the society. All the research work presented in this conference is truly exceptional, promising, and effective. These researches are designed to target the challenges that are faced by various sub-domains of the social sciences, business and economics, applied sciences, engineering and technology, health and medical sciences.

I would like to thank our honorable scientific and review committee for giving their precious time to the review process covering the papers presented in this conference. I am also highly obliged to the participants for being a part of our efforts to promote knowledge sharing and learning. We as scholars make an integral part of the leading educated class of the society that is responsible for benefitting the society with their knowledge. Let’s get over all sorts of discrimination and take a look at the wider picture. Let’s work together for the welfare of humanity for making the world a harmonious place to live and making it flourish in every aspect. Stay blessed.

Thank you.

Dr. Vincent W Ho

CONFERENCE SECHDULE

ANISSH-2019

Venue: Hotel MyStays Shin-Osaka Conference Center

Time: Registration & Kit Distribution (09:00 - 09:30 am)

Day: Saturday

Date: November 30, 2019

Venue: Room 1

09:30 am - 09:40 am	Introduction of Participants
09:40 am - 09:50 am	Inauguration and Opening address
09:50 am - 10:00 am	Grand Networking Session

DAY 01 Saturday (November 30, 2019)

First Presentation Session (10:00 am - 11:00 am)

Venue: Room 1

Presenter Name	Manuscript Title	Paper ID
Track A: Business, Management & Economics Studies		
IRBEMSH-119 ANI103	The Analysis of Research Hotspot and Frontier of Educational Reform Based on Bibliometric	Jia-Ling Kang
MABES-NOV-101	The Correlation and Impact of Personality Traits, Job Characteristics, Emotional Intelligence toward Emotional Labor a Study with Nursing Staff as the Subjects	Yang Sheng Yu
IRBEMSH-119-ANI105	High Quality Assisting Programs in Vocational High Schools in Taiwan	Hsiu-TE

Lunch Break & Ending Note (11:00 am - 12:00 pm)

Participants Registered As Listener/ Observer

The following Scholars/ practitioners who don't have any paper presentation, however they will attending the conference as delegates & observers.

Official ID: REIMA-NOV19-104A

Dr Leszek Pilch

AGH University of Science and Technology in Krakow, Poland

Conference Day 02 (December 01, 2019)

Second day of conference will be specified for touristy. Relevant expenses are borne by Individual him/herself.

The Analysis of Research Hotspot and Frontier of Educational Reform Based on Bibliometric

*Jia-Ling Kang

Department of Education-National Chengchi University (NCCU), Taiwan

Corresponding Email: 106152513@nccu.edu.tw

Keywords: Educational Reform, Bibliometric, Intellectual Base, Research Frontier

The research literature included in the Web of Science (WOS) database from 2015 to 2019 was selected. Using advanced bibliometric methods such as word frequency analysis, co-word analysis, and data visualization, the scale of education reform of higher education research, published journals, regional output distribution, major research institutions, leading authors and their cooperation networks, high-frequency keywords and significant research the thematic structure, the source of knowledge, etc. were analyzed by bibliometric and visualized, and a series of knowledge maps of higher education research were drawn. To a certain extent, the degree of attention in higher education research, the main content of the research, and the output model of higher education research found to some extent and some phenomena and laws that are difficult to find by traditional research methods found.

The Correlation and Impact of Personality Traits, Job Characteristics, Emotional Intelligence toward Emotional Labor a Study with Nursing Staff as the Subjects

^{1*}Yang Sheng Yu, ²Huang Limin

^{1,2}Tainan Municipal Hospital/Group Secretar, Taiwan

Corresponding Email: jade@mail.tmh.org.tw

Keywords: Personality Traits, Emotional Intelligence, Job Characteristics

The emphasis of medical service consists of the establishment of good interactive relationship with the clients. When facing clients, positive emotions shall be displayed, while the negative emotions shall be suppressed as to be beneficial for the hospitals image. Comparing to other industries, the medical industry has several differences. In addition to the uncertainty risks of the medical behaviors and the information asymmetry between physicians and patients, the medical staff also undergo through the interference of insurance companies and public policies, the systems limitations on National Health Insurance budgeting as well as the hospital business performances, which may cause the decrease of productivity, care quality and morale. In other words, high pressure and emotional management has a great impact toward the operation of the medical institution. Not only will it result in the decrease of care quality, the increase of training cost but also affect the continuity and care quality for the services provided to the patients. This study aims to explore the correlation and obvious impact of the nursing staffs personality traits, job characteristics, emotional intelligence toward emotional labor.

High Quality Assisting Programs in Vocational High Schools in Taiwan

^{1*}Hsiu-TE

National Taiwan Normal University, Taipei, Taiwan

Corresponding Email: shtiowa@yahoo.com.tw

Keywords: High Quality Assisting Program (HQAP), Technical and Vocational Education (TVE), Vocational High Schools (VHSs)

Vocational education in high schools used to have great influence and contributions on technical manpower cultivation in Taiwan, which has accelerated economic prosperity and social development. However, with the change of industrial structure development from labor-intensive to technology-intensive and further to knowledge-intensive, traditional ways of running schools in vocational highs are no more sufficient to adapt to changes in industrial environment. Thus, it is a must for vocational high schools to innovate their curriculum and teaching. Technical and vocational education in vocational high schools nowadays should give top priority to 12-year basic education planning and implementation, strengthening existing qualified teachers, teaching and equipment, balancing industry and region development, supervising schools to well use social resources so as to provide students with quality and multiple learning environment and thus achieve high quality development in vocational high schools. For this purpose, Ministry of Education in 2008 drafted High Quality Assisting Program (HQAP) to reinforce school running quality in vocational high schools. The HQAP aims to improve the quality of vocational school teachers, courses, teaching, and facilities, and virtually enhance competitive power in vocational education. Since 2014, Taiwan has implemented 12-year basic education and subsidized both private and public schools with a view to attracting more students who are apt at vocational practice. With the guidance of the program, the enrollment in vocational high schools has not decreased under the impact of low fertility.

Adaptation of Thai Women whose husbands migrate to work abroad

^{1*}Suvimon Khamnoi , ²Dr.Dusadee Ayuwat

^{1,2}Khon Kaen University, Thailand

Corresponding Email: suvimon.k@kkumail.com

Keywords: Adaptation, Migration To Work Abroad

This article investigates the adaptation of women whose husbands migrate to work abroad. The qualitative research method was employed. In-depth interview was the tool and conducted with the key informants, including 20 Thai women who left behind international migration for more than one year and 10 key informants. Data were collected from April to May 2019 in Tumbon Kho Tai, Sawang Dandin district, Sakon Nakhon province; there is a district with the highest number of international migration. Content analysis method was applied to data analysis. The results showed that women whose husbands migrate to work abroad as a person who left behind have to adapt themselves by changing the way of agricultural production, household expense plans, and career. Thought involves the husbands migration patterns.

Factors Influencing Work-life Balance of Thai University Staff Members

^{1*}Nattawat Auraiampai , ²Wanichcha Narongchai

^{1,2}Khon Kaen University, Thailand

Corresponding Email: nat@kkumail.com

Keywords: Work-life balance, Job satisfaction, Attitude toward work, Organization Culture, Engagement

This article aims at explaining the factors influencing the work-life balance of Thai University staff members. The quantitative research method was applied based on the analytical unit at an individual level. The data was collected from January to February, 2018 using the questionnaire that measures peoples happiness with the sample group comprising 2,873 Khon Kaen University staff members (72.1% of the total of 3,898 members). The descriptive analysis and the multiple regression statistics were applied with the data in order to find the factors influencing the work-life balance of Thai university staff. The findings show female majority among the respondents (65.6%). Most of the sample group (44.4%) were at the Gen X age range (39-53 years), whereas 18.3% were at the Gen B age range (54 years old and over). Most (42.1%) hold a bachelors degree, 78% are supporting staff and 22.0% are academic staff members. The analytical results show the majority (64.8%) have the work-life balance while 35.2 percent do not. Age, absence of congenital disease, being supporting staff, perception of organization culture, job satisfaction, attitudes toward work and organization, and organization engagement are the factors significantly influencing the work-life balance at the level of 0.01. The factors studied explain the variation of the work-life balance of the staff at 41.7% ($R^2=0.417$).

Factors related to The Structural Violence in Women's work: A Case of Khon Kaen Province, Thailand

^{1*}Dusadee Ayuwat,²Piyakamon Mahiwan
^{1,2} Khon Kaen University, Thailand
Corresponding Email: dusayu@kku.ac.th

Keywords: Structural Violence, Womens work, Violence in work

This research aims to examine factors related to structural violence in womens work. The quantitative methodology was employed with individual level as a unit of analysis. The sample consisted of 398 women who are working in government agencies and private enterprise. The samples were randomly by multi-stage sampling technique in 9 municipals of Khon Kaen province. The data were collected using the interview schedule from May to June 2018 and analyzed by descriptive statistics and Chi-square. The results found that most of women samples were in Generation Y (19-38 years old). 51.3% of women sample were married, and 43.7% got a bachelors degree or higher degree. Most of women sample was worked in large organizations and 40.7%of the women samples have worked more than 10 years. The result showed that 23.9% of women samples were subjected to the structural violence in work at a rather high level and high level (combined). When analyzing factors related to the structural violence in womens work with Chi-square, it was found that the characteristics of women (age and education level), work condition factors (the understanding of women's labor rights), and social and gender factors (socialization of gender roles and self-efficacy in work) are the factors that related to the structural violence in womens work at the low level of relationship at 0.265 0.214 0.270 0.315 and 0.224 respectively at statistically significant 0.01 level.
